

DRILLING TOOLS INTERNATIONAL

is the leading drilling tool rental, manufacturer and refurbishing provider for the global oil and gas industry.

- Stabilizers
- Drill collars
- Roller reamers
- Thread protectors
- Lifting bails
- Accessories
- Hardfacing

The Drilling Tools International team is ready to respond 24 hours a day and seven days a week because we know downtime in the oilfield is costly.

A Worldwide Drilling Tool Provider

DRILLING TOOLS International

A Legacy of Industry Excellence

Operating for more than 25 years, Drilling Tools International continues to be a company you can count on.

For more than two decades, despite the ups and downs of the oil and gas industry, our long history of stability is a testament to our quality products and services and loyal customers. Drilling Tools International is continually expanding and has become an international leader in downhole drilling tools.

With our downhole tools being used on domestic and international projects and a majority of our business coming from repeat customers, the Drilling Tools team offers stability, quality tools and superior customer service.

Quality Should Be Required

Drilling Tools International continually invests in the necessary training, equipment and technology to maintain the highest quality standard.

Our team has achieved both API and ISO certification, proving our commitment to manufacturing quality products. At Drilling Tools International, quality is everyone's responsibility. All our staff members are well acquainted with the company's high quality standard and the role they play in making this happen. Our mission is to deliver defect-free products and services, on time every time.

In addition, we are continually working to improve our customer service, value, technology and products while adhering to all regulatory requirements.

Drilling Tools International has earned the following certifications:

- API Spec 5DP
- API Spec 7-1
- API Spec Q1
- ISO 900-2008
- ISO –TS 29001

Rentals, Manufacturing and Refurbishing of Downhole Drilling Tools

Drilling Tools International rents, manufactures and refurbishes downhole drilling tools and accessories for the global oil and gas market.

Our seven manufacturing facilities offer multiple hollow spindle lathes, mills (accommodating up to 28 inch OD stabilizers), racking systems, lathes – both CNC and manual, and drill collar spiral machines. Machine shop services include the reworking of drill collars and heavy weight drill pipe, spiraling of drill collars, hardbanding services and Kemplate application.

Drilling Tools International's hands-on approach to customer service means we do whatever it takes to get the job done right.

As the leader in high-quality downhole equipment, Drilling Tools International provides a full range of drilling tools and accessories including:

- Welded blade steel stabilizers
- Integral blade steel stabilizers
- Welded blade non-magnetic stabilizers
- Integral blade non-magnetic stabilizers
- Sleeve type stabilizers
- Non-magnetic drill collars
- Roller reamers
- Slick and spiral steel drill collars
- Pup joints
- Rotary subs
- Crossover subs
- Lift subs
- Integral pup joints
- Saver subs
- Kelly saver subs
- Circulating subs
- Top drive subs
- Side entry subs
- Double side entry subs
- Lift plugs

Hardfacing Increases Downhole Tool Life

Our proven hardfacing processes ensure precision and increased downhole tool life. Drilling Tools International provides multiple types of hardfacing to meet our customers' specific tool needs.

COMPOSITE TUNGSTEN CARBIDE ROD

Composite rod uses a non-ferrous matrix to suspend the carbide. It is the best known hardfacing and is used in formations from soft to medium in hardness. It is best suited to welded blade stabilizers.

TCI (TUNGSTEN CARBIDE INSERTS)

TCI (Tungsten Carbide Inserts) is another hardfacing that lends itself to hard abrasive drilling.

GEOTECH

Geothermal hardfacing uses tungsten carbide bricks that are brazed to the stabilizer blade and surrounded by tungsten impregnated composite rod, an excellent hardfacing for hard, abrasive drilling.

X-TRA LIFE

X-tra Life is our premier hardfacing, which suspends fine tungsten carbide pellets or crushed material in a hard, ferrous matrix.

QUICKTIP

QuickTip uses tungsten carbide inserts. A majority of the blade surface is covered with tungsten carbide, and sintered tungsten carbide is used as the wear medium. Large individual wear elements are used over an equivalent area of small grains providing a significant improvement in wear resistance.
